

Primer 20

Porous surface primer

Description

Primer 20 is a high performance single component chemically active, non-toxic liquid for brush application to prime porous surfaces.

Advantages

- Easy to Apply
- Strong adhesion

Application

Open tin lid. Mix thoroughly until a homogeneous dispersion is achieved.

Apply one thin coat using a clean dry brush. Avoid over application of primer causing puddles in the bottom of the joint. Sealants must be applied when the primer has become touch dry, that is after the evaporation of the solvent, but before the primer film has completely reacted. If the primer film has become completely tack free, the surfaces must be reprimed before applying the sealant.

Cleaning

Clean equipment immediately after use with Fosroc Solvent 102.

Estimating

Supply

Primer 20:	500 ml can
------------	------------

Coverage

Primer 20:	4 - 5 m ² / ltr
------------	----------------------------

Storage

Shelf life

12 months if stored in the original unopened packs in a cool dry place. Do not store in direct sunlight.

Precautions

Health and safety

Primer 20 is flammable liquid. Shall be stored away from heat. and shall not be used near a naked flame. Skin contact shall be avoided. Eye protection and impervious rubber or PVC gloves shall be worn. Splashes must be washed off immediately. Prolonged breathing of vapour shall be avoided.

Hands shall be washed thoroughly before eating or smoking. In the case of eye contact, medical attention shall be sought immediately.

Disposal

Dispose according to local authority regulations. Do not dispose into sewer or drains.

Additional information

Primer 20

Flash Point	>50 °C
Storage Life	12 months (@ 5 – 25 °C)
Drying time	20 – 60 min.
Flash Point-Fosroc	33°C
Solvent 102
